BUILDING ENVELOPE CAMPAIGN

Helping building owners/managers **PUSH THE ENVELOPE**

The **Building Envelope Campaign** (BEC) is a program designed to help building owners and managers create more energy efficient buildings through the improvement of building envelope performance (BEP). The BEC provides a new building envelope assessment tool for determining your building's BEP-value identifying areas for potential envelope improvement. Best of all, joining the campaign is free and obligation-free!

Interested in becoming a **participant** or **supporter**?

PARTICIPANT

Participants (building owners/managers, architects, general contractors, consultants, etc.) will be given access to campaign resources—including the building assessment tool—and technical expertise in evaluating envelope options.

As a participant, you will have the opportunity to:

- Be publicly recognized for your participation
- Stay informed of envelope technologies and resources produced through the campaign
- Collaborate with the BEC in the development of case studies

Participants are also eligible to receive **annual awards** presented at large industry events, including:

- Novel 20 or 40 (for new construction)
- Retro 30 or 50 (for retrofit projects)
- Honorable Mention
- Role Model

SUPPORTER

Supporters (manufacturers, researchers, utilities, industry organizations, etc.) are invested in the campaign even though they may not be able to submit buildings for recognition.

As a supporter, you will be able to:

- Access technical expertise regarding envelope technologies
- Partner with the BEC technical team to promote the campaign
- Receive public recognition for your support

ELIGIBLE BUILDINGS

- New construction or retrofit
- Commercial or multi-family residential
- Completed since January 2019
- Located in the USA
