

SOLUTION AT A GLANCE: STANDARD ENERGY EFFICIENCY DATA (SEED) PLATFORM

SECTOR

Commercial, Multifamily, Residential

TOOL TYPE

Energy Use Dashboard

BARRIER:

Rapid increase in building performance data from multiple sources in varying formats inhibits management and analysis.

CAPABILITIES, FEATURES, & CORE FUNCTIONS:

- Combine, manage, clean, store, compare, and share data from multiple sources about a large group of buildings
- Platform offers add-on capabilities to support apps, analysis features, and graphics.

OVERVIEW

The SEED platform is a free open source database platform to manage disparate data about building portfolios. The purpose of the tool is to help public agencies that are either implementing building performance reporting regulations and/or tracking the performance of their own buildings.
