

# Holistic Climate Action Plan Launched to Achieve Ambitious Science-based Target and Net Zero Goals

Marriott launched its Climate Action Program (CAP), a holistic approach to reduce climate risks, promote sustainable growth, and achieve a science-based target of net zero greenhouse gas emissions across operations that include its 8,300+ hotel portfolio.

- ▶ Set science-based target consistent with 1.5° C by 2030, net zero by 2050 supported by over 20 achievement policies and programs
- ▶ Developed individual carbon and energy targets for all 8,300+ properties
- ▶ Launched portfolio-wide Energy Optimization Program to identify key decarbonization activities at the property level
- ▶ Conducted over 100 third-party energy assessments in 2023
