

Program administrators and implementers: Use this sample design as a starting point to provide supplement your existing Custom program.

Benefits:

1. Expand portfolio of energy efficiency offerings with a Program based on ISO 50001.
2. Leverage DOE’s world-class resources to create value for customers while minimizing program development and implementation costs.
3. Provide industrial and large commercial customers with national recognition from US DOE.

This sample design is based on US DOE’s award-winning 50001 Ready Navigator, an online guide to establish or enhance an energy system, and is supported by a variety of tools and resources publicly available from US DOE.

In this design, customers are guided through 4 workshops over a year. These workshops:

1. Teach customers how to use 50001 Ready Navigator
2. Introduce Navigator’s four sections, and
3. Presents the tasks for each section and tools available to complete the tasks.

In addition, utilities can provide custom program resources to support the identification of energy efficiency projects

Sample Design:

	Workshop	Navigator Tasks
1	Planning	1-5
2	Energy Review	6-13
3	Continual improvement	14-18
4	System management	19-25
