

You bought your dream home.

What's next?

U.S. DEPARTMENT OF ENERGY

Home Energy Score

Now is the time to make the house your home. Use Home Energy Score to help make smart choices when it comes to investing in energy systems and upgrades.

Just like sanding floors and repainting walls, many improvements, like adding insulation, are easier to do before you move in. But, it's never too late and the sooner you make sound energy investments, the sooner you'll benefit from lower utility bills, a more comfortable home, and even better air quality.
