

Video Transcript

When will all of these changes take place? This slide is designed to help you understand the timings involved. The two protocols we have discussed, Edition 2's, are available now on the U.S. DOE SEP 50001 website. You can find both Edition 1 and Edition 2 on the site.

The Accreditation Bodies will begin working from now until the end of January 2024 to be ready to work with our Verification Body partners. Our Verification Bodies will begin working from now until the end of December 2024 to complete that transition. Our organizations will work with their Verification Bodies to determine which edition of the protocol to use, but by December 20th, 2024, everyone will be using Edition 2. Our training partners will begin updating their material, and courses offered starting March 2024 will incorporate Edition 2 of both protocols.

As always, if you have any questions or need additional information, please feel free to reach out to the Scheme Owner. We are more than happy to help at any time.
