

## The State of CHP: Ohio

Combined heat and power (CHP) – also referred to as cogeneration – is an efficient and clean approach to generating on-site electric power and useful thermal energy from a single fuel source. The information in this document provides a general overview of the state of CHP in Ohio, with data on current installations, technical potential, and economics for CHP.

### Ohio: Installed CHP

#### U.S. DOE Combined Heat and Power Installation Database

The DOE CHP Installation Database is a data collection effort sponsored by the U.S. Department of Energy. The database contains a comprehensive listing of combined heat and power installations throughout the country, including those in Ohio, and can be accessed by visiting <https://doe.icfwebservices.com/chp>.

#### CHP Project Profiles

The Midwest CHP TAP has compiled information on certain illustrative CHP projects in Ohio. You can access these by visiting the Department of Energy’s CHP Project Profiles Database at <https://betterbuildingsolutioncenter.energy.gov/chp/chp-project-profiles-database>.

#### Midwest CHP Technical Assistance Partnership

For assistance with questions about specific CHP opportunities in Ohio, please consult with the Midwest CHP TAP by visiting [mwchptap.org](http://mwchptap.org) or contacting the CHP TAP director.

#### Ohio Existing CHP

Sector	Sites	Capacity (MW)
Industrial	26	430
Commercial/Institutional	33	104
Other	6	4
<b>Total</b>	<b>65</b>	<b>538</b>

## Ohio: Technical Potential for New CHP Installations

The “Combined Heat and Power (CHP) Technical Potential in the United States” market analysis report provides data on the technical potential in industrial facilities and commercial buildings for “topping cycle” CHP, waste heat to power (WHP) CHP, and district energy CHP in the U.S. Read the report [here](#).

## Ohio CHP Technical Potential

Sector	Potential Sites	Potential MW
Industrial	2,902	4,288
Commercial/Institutional	10,292	3,000
<b>Total</b>	<b>13,194</b>	<b>7,288</b>

Ohio Technical Potential (MW) for Industrial CHP Applications

Application	50-500 kW		0.5 - 1 MW		1 - 5 MW		5 - 20 MW		>20 MW		Total	
	Sites	MW	Sites	MW	Sites	MW	Sites	MW	Sites	MW	Total Sites	Total MW
Chemicals	272	51	106	78	153	362	68	625	13	516	612	1,633
Primary Metals	123	29	55	40	53	124	21	199	7	224	259	615

## Department of Energy CHP Accelerators

### Packaged CHP Accelerator

Standardized packaged CHP systems can reduce risk for both CHP users and suppliers by reducing design errors, limiting uncertainty about performance, shortening project development time, and reducing overall costs. Accelerator partners will validate the installation, performance, and economic and resiliency benefits of packaged CHP systems, evaluate the integration of new technologies and packaged CHP, and identify R&D challenges. For more information, visit <https://betterbuildingssolutioncenter.energy.gov/accelerators/packaged-chp>

### CHP for Resiliency Accelerator

The U.S. DOE collaborated with cities, states, utilities, and other stakeholders who are actively pursuing CHP as a consideration in resiliency planning for critical infrastructure in their jurisdictions. This included defining resiliency, identifying critical infrastructure, and assessing CHP opportunities. This process was documented in the DG for Resilience Planning Guide and the CHP for Resilience Screening Tool. For more information, visit <https://betterbuildingssolutioncenter.energy.gov/accelerators/combined-heat-and-power-resiliency>

## Ohio: CHP Economics

The most important indicators for CHP economics are electricity and gas prices. For most potential CHP installations, natural gas and electricity rates for host facilities will fall within the range of average commercial and industrial prices. Lower energy prices may be possible for large CHP applications.

### Ohio Natural Gas Prices

The EIA industrial natural gas price is a full tariff rate, and most large consumers are purchasing gas commodities from marketers at a lower rate.

#### Ohio Average Gas Prices (\$/MMBtu) - 2017

Sector	OH Price	U.S. Price
Citygate*	4.06	4.26
Industrial	6.88	4.20
Commercial	6.26	8.08

\*Citygate is a point or measuring station at which a distributing gas utility receives gas from a NG pipeline company or transmission system.

#### Ohio Average Natural Gas Prices

### Ohio Electricity Prices

Electricity rates can vary greatly by utility and facility size range. The rates below from EIA represent general averages; individual facility rates may vary.

#### Ohio Average Electricity Prices (\$/kWh) - 2017

Sector	OH Price	U.S. Price
Industrial	6.92	6.88
Commercial	10.05	10.66

#### Ohio Average Electricity Prices

#### Ohio Average Delivered Electricity Prices by Utility

Utility	Industrial Price (\$/kWh)	Commercial Price (\$/kWh)	Average Price (\$/kWh)
AEP Ohio	12.28	11.53	11.91
FirstEnergy (Toledo Edison)	8.82	12.51	10.66
FirstEnergy (Ohio Edison)	9.15	11.68	10.42
Dayton Power & Light	12.19	8.52	10.35
FirstEnergy (Illuminating Co)	6.33	12.73	9.53
Duke Energy Ohio	8.45	9.50	8.97
