

Fire Station Energy Challenge

What's in this Issue:

- Fifth Energy-Reduction Winner (Sixth monthly winner)
- Overall Winner of the Challenge
- Spotlight on our winner
- One change you would make
- If you have any questions or comments please email us at [ener-gy@elpasotexas.gov](mailto:energy@elpasotexas.gov).

What is one change that would make a huge difference in your fire station?

If you could have a couple compact fluorescent light bulbs (CFLs) or LEDs for certain areas of the fire house, or motion sensors in storage rooms, what do you think would have the largest impact?

Throughout the challenge, we received a lot of great input from our fire fighters about where they've noticed energy is used the most.

Some stations have mentioned lighting, and others have mentioned air conditioning units. If you could change one thing about your fire station what would it be? Please email us at [ener-gy@elpasotexas.gov](mailto:energy@elpasotexas.gov) with your thoughts!

Our fifth energy-reduction winner is...

For the last month of the challenge, we would like to recognize our fifth energy-reduction winner. This station reduced their energy use by 23%! Very closely behind was Station #34 with 22%, who was actually our winner last month!

And our fifth energy-reduction winner is...

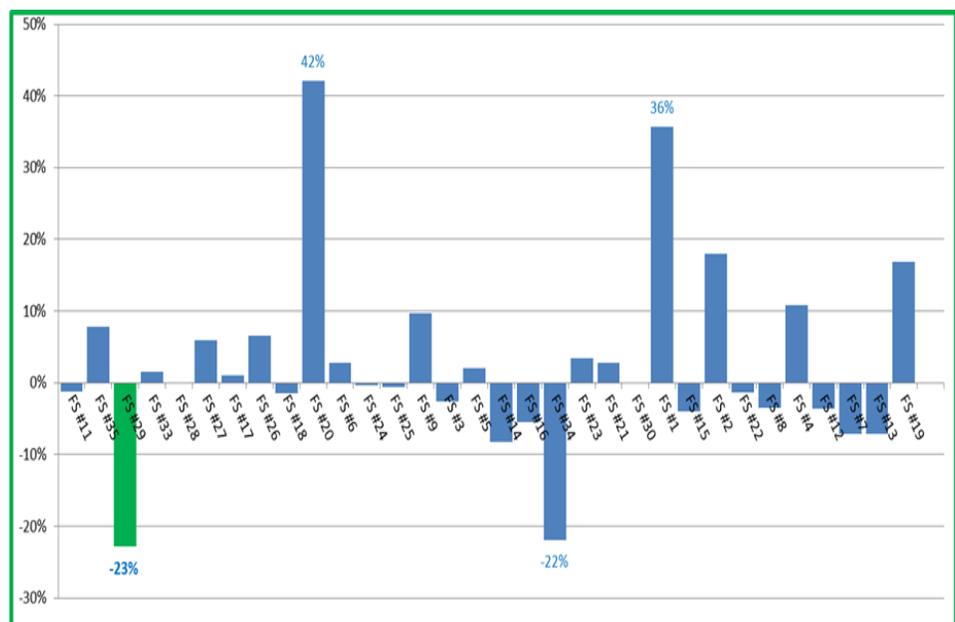

FIRE STATION 29!

Note: Stations 10 and 31 were excluded from the graph because their increases distorted the graph.

Check out Page 2 to see who our **OVERALL WINNER** of the Challenge is...

Fire Station Energy Challenge

And the Overall Challenge Winner is...

We would like to thank all of our wonderful fire fighters for all of your hard work throughout the challenge.

We hope that your station was able to identify and modify high energy consumption behaviors and that you will continue your energy reduction changes in the future!

Please let us know if you ever have any energy questions in the future!

ALAS, these six months have flown by! We would like to congratulate our overall winner of the challenge. This station consistently showed lower energy usage and proactively pursued ways to reduce their energy bill.

A big CONGRATULATIONS to our overall winner...

FIRE STATION 29!

No surprise here, as they consistently reduced their energy and won three of the six months in this challenge. They reduced their energy by 21%, with Station #3 in 2nd place at 16%.

Overall, 82% of the stations reduced their energy!

We are so appreciative our fire fighters' hard work throughout this energy reduction challenge!

Here is the list of our winners:

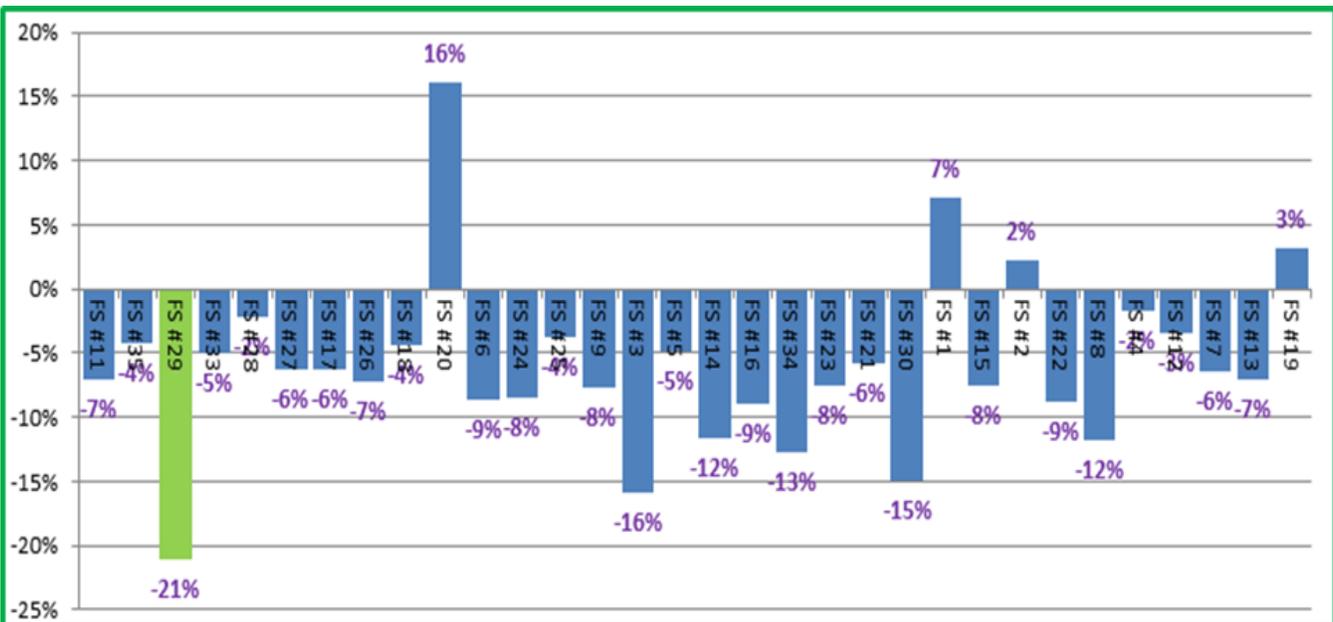

- Best Plan: **Fire Station 6**
- 2nd winner: **Fire Station 26**
- 3rd winner: **Fire Station 29**
- 4th winner: **Fire Station 29**
- 5th winner: **Fire Station 34**
- 6th winner: **Fire Station 29**
- Overall challenge winner:
⇒ **Fire Station 29**

Here's how they did it:
